

TS KEGG enrichment

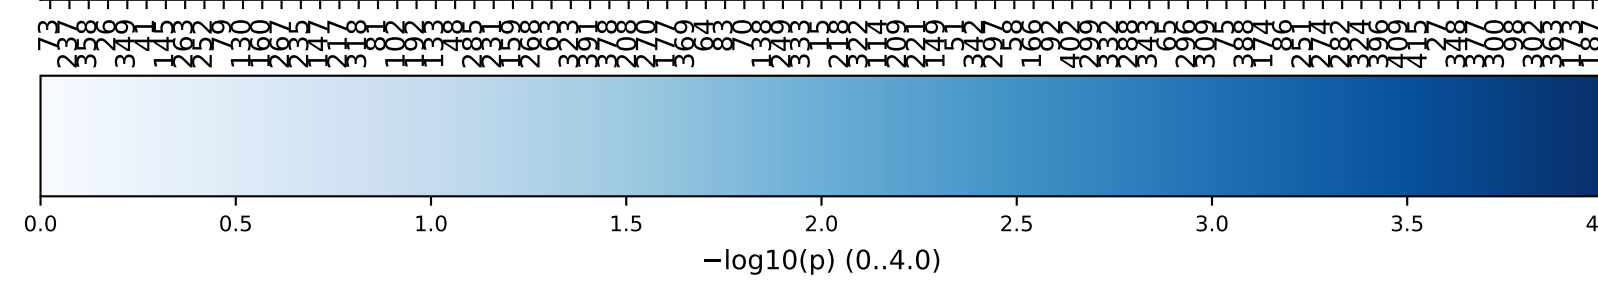

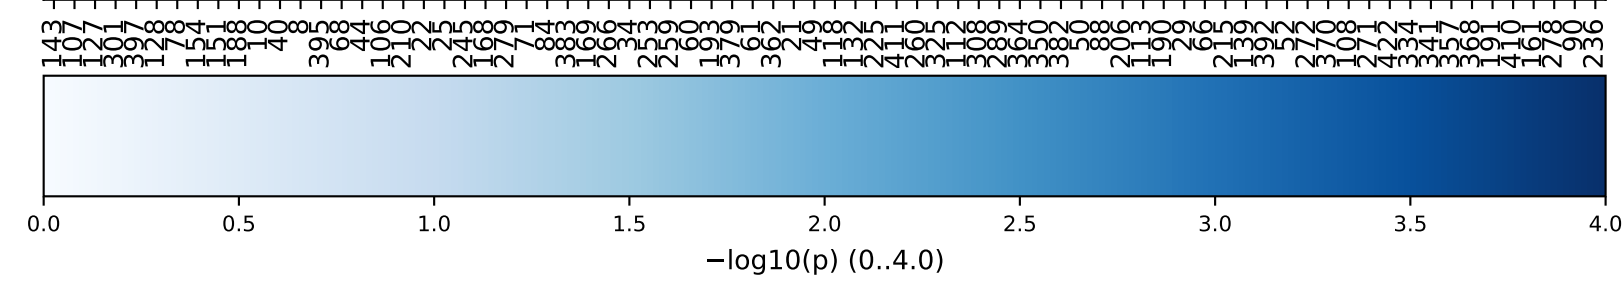

CT KEGG enrichment

- Category
- Genetic Information Processing
  - Metabolism
  - Human Diseases
  - Cellular Processes
  - Organismal Systems
  - Environmental Information Processing

- Subcategory
- Replication and repair
  - Carbohydrate metabolism
  - Transcription
  - Glycan biosynthesis and metabolism
  - Metabolism of other amino acids
  - Lipid metabolism
  - Cancer: overview
  - Xenobiotics biodegradation and metabolism
  - Drug resistance: antineoplastic
  - Translation
  - Chromosome
  - Transport and catabolism
  - Metabolism of cofactors and vitamins
  - Immune disease
  - Cellular community - eukaryotes
  - Endocrine and metabolic disease
  - Immune system
  - Metabolism of terpenoids and polyketides
  - Signal transduction
  - Environmental adaptation
  - Global and overview maps
  - Signaling molecules and interaction
  - Neurodegenerative disease
  - Endocrine system
  - Infectious disease: parasitic
  - Cancer: specific types
  - Cardiovascular disease
  - Energy metabolism
  - Amino acid metabolism
  - Membrane transport
  - Infectious disease: viral
  - Cell motility
  - Nucleotide metabolism
  - Digestive system
  - Information processing in viruses
  - Development and regeneration
  - Sensory system
  - Nervous system
  - Cell growth and death
  - Infectious disease: bacterial
  - Substance dependence
  - Circulatory system
  - Excretory system
  - Aging

- Regions (hist)
- AC
  - MF
  - PCG
