

TS KEGG enrichment

CT KEGG enrichment

- Category
- Genetic Information Processing
 - Organismal Systems
 - Metabolism
 - Cellular Processes
 - Human Diseases
 - Environmental Information Processing

- Subcategory
- Replication and repair
 - Transcription
 - Translation
 - Endocrine system
 - Glycan biosynthesis and metabolism
 - Carbohydrate metabolism
 - Metabolism of other amino acids
 - Transport and catabolism
 - Environmental adaptation
 - Neurodegenerative disease
 - Chromosome
 - Metabolism of cofactors and vitamins
 - Signaling molecules and interaction
 - Drug resistance: antineoplastic
 - Lipid metabolism
 - Signal transduction
 - Xenobiotics biodegradation and metabolism
 - Amino acid metabolism
 - Cell motility
 - Infectious disease: parasitic
 - Digestive system
 - Cellular community - eukaryotes
 - Cancer: overview
 - Cancer: specific types
 - Global and overview maps
 - Immune disease
 - Nucleotide metabolism
 - Infectious disease: bacterial
 - Energy metabolism
 - Metabolism of terpenoids and polyketides
 - Cardiovascular disease
 - Endocrine and metabolic disease
 - Substance dependence
 - Nervous system
 - Immune system
 - Infectious disease: viral
 - Cell growth and death
 - Membrane transport
 - Development and regeneration
 - Excretory system
 - Circulatory system
 - Sensory system
 - Aging
 - Information processing in viruses
